## *Polish Airline* LOT

The client wanted a contemporary look for this colorful poster. The poster measures 27" x 38".

We decided to mimic some of the buildings in the modern cityscape by cutting and sanding small slices of wood to make the building profiles. These slices were then glued to a flat 4" wide primed wood liner.

The liner was sprayed using a black "rattle can" finish.

An angular outer frame surrounds the black wood liner with the buildings on it.
